Dr. Hussein Ibrahim (Chairman, Business Development)

Dr. Nihal Nounou (General Manager)

## Products and Services

### Nature of Business

#### **Main Activity:**

Horizons Software, established in 1999 as a personal company and re-registered as a private share holding company in 2002, *is a leader in providing innovative, strategic-level business-driven, and architecture-focused solutions empowering customers to manage change and align their business strategies and operations.*

We use innovative products and state-of-the-art methods in our solutions. Our Strategy Management solutions use our Strategy Architect Software which supports the Balanced Scorecard (BSC) framework and the full strategic management cycle, while our Project Management Office, and Business Process Management (BPM) solutions use our Process Architect Software which supports business process capturing, analysis, design,

automation, and monitoring. Our Enterprise Architecture, Business Blueprinting and Knowledge Management solutions use GoAgile MAP suite of products. All of our software systems natively support Arabic and Hijri Dates.

Our solutions employ a repository-based visual architecture framework that captures, links, and analyzes all components of an enterprise (strategy, process, HR and IT) in a dynamic and holistic way. We support all kinds of architecture framework and provide a massively customizable environment to provide our customers with their needs.

Our software development process has been appraised at CMMI level 3 June 2006, and was re-certified in June 2010, ensuring high quality and international software development process compliance. Our people are highly innovative with extensive experience internationally and in the Middle East region.

We provide our services through offices and partners in Egypt, Saudi Arabia, Qatar, Kuwait, and UAE. Our customers are dynamic organizations looking forward to continuously improve their operations, control their strategy execution, avoid pains of growth, and reaching business excellence. We have deployed our solutions in many countries and we pride ourselves in our excellent after service support. We partner with a wide variety of companies to offer our customers more integrated flexible solutions.

The following represents the main components of our Solutions Offerings:

- Business Blueprinting using Enterprise Architecture (EA) Methods and Frameworks.
- Business Strategy development using Balanced Scorecard Framework.
- Business Strategy Execution Systems using Horizons Strategy Architect Suite of products.
- IT Strategic Planning using EA Frameworks, Technology Reference Models (TRM), IT best practices such as ITIL, and COBIT, and the BSC Framework.
- IT Services Assessment and Training
- Process Improvement and Automation Services using Horizons Process Architect Product.
- Model-Based, Service-Oriented Software Development.
- Strategy and Enterprise Architecture Training and Seminars.

With the variety of our offerings and the ability to integrate all of them we offer our customers unique values:

- Actionable enterprise strategy linked and traced to all business components using Enterprise Architecture Frameworks and methods
- Holistic and effective change management
- Knowledge leverage and preservation
- Effective enterprise communication
